DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In the claims, a database programmed to store permissioning data between price users and price sources lacks support in the specification. Moreover, a processor programmed to display and update in real time and simultaneously, in response to a user request, the most current price information and time of receipt information from each of said price source identifiers permitting access to said price information lacks support.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claim, the term permissioning data is vague and indefinite as it is not clear what permission is granted and from whom the permission is being granted.
